EDUCATION

2020 - Present

CAN THO UNIVERSITY (CTU)

- Major: Information Technology
- GPA: 3.49 / 4.0

PROGAMMING SKILLS

Programming language

- Java

Database

- MySQL

Framework

- JavaFX

Other

- Git
- Agile/Scrum

OTHER SKILLS

- English: B2 Certificate
- Teamwork
- Time management
- Communicating

SUMMARY

As a senior Information Technology student at Can Tho University, I am inherently curious and love exploring new knowledge. I especially enjoy confronting new challenges and overcoming them eventually. Based on my available knowledge, I can acquire new technologies easily and I always try to apply them in the real world. I am eager to pursue a long-term career in my field.

I have spent a long time learning Java, and I hope to become a Java Developer and contribute my best to the company's development. In the future, I will try to improve my qualifications and gain more work experience.

PERSONAL PROJECT

Clinic Management System (2024)

- This project uses the JavaFX framework to build a Java application. The application was created to support managing the clinic easily and consistently. Four users currently utilize this application, with each user having specific functionalities.
- For the receptionist: register for the new patient, view personal patient information, access medical history, and manage personal information.
- For the doctor: view patient list, select a patient for examination, view patient health record, provide diagnosis, create a prescription, and manage personal information
- For the pharmacist: CRUD operation for medicine, manage invoices, manage prescriptions, and manage personal information
- For the manager: manage the other user accounts, reset passwords for other users, track user activity, and manage personal information.
- **Technology:** Java, JavaFX, MySQL.
- **Github:** https://github.com/kaitogiang/Clinic-Application.git

Milk Tea Management System (2023)

- This project is the first to utilize the JavaFX framework in building a Java application designed to facilitate the sales process for employees.
- The main functionalities of the application include:
  - CRUD operations for products
  - Searching for products
  - Ordering the products based on the customer's requirements
  - Generating statistical charts of the number of products sold in the store.
- **Technology**: Java, JavaFX, MySQL.
- **Github:** https://github.com/kaitogiang/Milk-Tea-Application.git
